promotions or discounts**

May 26 - June 1

Tips to Keep Your Villa Cool

1. Close draperies when leaving for the day.
2. When you are in the villa, use the ceiling fan to circulate air.
3. The stand fan is a GREAT way to circulate air from one room to another.
4. Your thermostat has been programmed to a low setting of 72 degrees. A temperature setting below 72 degrees will result in equipment failure.
