

In Kenya's wild wild North, located on a private 95,000 hectares conservancy bordering with Samburu National Reserve, Saruni Samburu is perched on top of a spectacular viewpoint. From its villas and swimming pool you enjoy the snow-peaked Mount Kenya, the sacred mountain Ololokwe and the vast savannah where herds of elephant roam. At our waterhole reticulated giraffe, Grevy's zebra, leopard, kudu and many other species gather to drink. The purity of this landscape, combined with the untouched culture of the Kalama community, give you a different experience in one of the most iconic African destinations.

Our professional guides are members of the local community who share with you a deep understanding of their land. While looking at big game during a drive or studying wildlife tracks on a walk, during a bush lunch by the acacia trees or exploring ancient rock art caves, the Samburu guides show you the secrets of the African bush. Gourmet cuisine and a new design add style to the adventure.

Samburuland is classic Africa. The wildlife, the people, the landscape are a dream. Under this immense sky, and its many stars, our design lodge provides an exhilarating experience of luxury and adventure.
